

NATURAL BEAUTY

Display the richness and subtle beauty of natural wood in your project. Available in many traditional or contemporary styles, each door is run through an advanced CNC router operation. The result is a door of peerless quality and unmatched craftsmanship.

RED OAK

A warm, open grained wood that is typically tan to red in color. Accepts stains easily.

RIFT WHITE OAK

Hard, strong wood that is light brown to almost white in color with a moderate grain. White Oak is rift sawn to reduce natural flecking. Easy to work and readily receives stains.

EASTERN MAPLE

An impressive closed grain wood that is creamy white in color. Natural, uneven grain patterns add handsome texture which are enhanced when stained.

ALDER

A relatively soft hardwood that is light tan to light brown with hints of yellow or red. Straight grained and uniform texture allow for consistent, even stain application.

* Other species available upon request. Refer to Finish Coatings page to learn more about available door finishes.

BETTER WITH AGE

Phase II wood doors are ideal for those who appreciate the classic, natural mellowing characteristics of wood. A variety of stains, lacquers and custom finishes are available to protect, highlight, and gracefully mature the visual texture of the doors.
